### Program Description

NoteIT v.1.93 is a quick and easy to use yet powerful address book, calculator and note taking application. The program was designed under three guiding principles:

- **"Easier is better."**
- **"Concentrate the most power in a pinhead."**
- **"Minimize keystrokes."**

The result was a very easy to use and intuitive program with multiple uses. The following NoteIT uses can be highlighted:

- **Address book.**

NoteIT can store and manage with ease more than 150,000 contacts with automatic email and web address recognition. This enables the user to find contacts very quickly and send email, or to open web pages, without the need to manually open a second program. NoteIT's powerful find feature enables users to retrieve contacts by note title, note content, or last edition date. Contacts can also be instantly retrieved by typing the first few characters of the note's title, or by scrolling up and down the note titles list scrollbar.

- **Note taker.**

The program allows users to take notes about anything they might need to remember. NoteIT's built in error redundancy features prevent information loss and allow for backups to any drive. Everything is saved into the notes database, including notes without an assigned title or unsaved notes. This takes place seamlessly without interfering with the users work. Additionally, NoteIT allows storing multiple notes with identical titles, or multiple fully identical notes.

# DSSF

- **Search Engine Interface.**

Get Web search results for any note title, for any term or for any selection in a note's text from your desktop.

- **Text file archive.**

Text files can be imported into NoteIT individually. The program can store more than 150,000 text files while at the same time permitting for precise and fast searches.

- **Simple html editor.**

NoteIT can export its notes into html format seamlessly, upon need to post any or multiple notes in a web server.

- **Research aid.**

The program is an ideal research companion. It allows storing multiple entries of information seamlessly, allowing later to conduct quick searches and literally "find a needle in a bulk of hay." Also, researchers can print partial, one, or multiple notes, in portrait or landscape layouts, to any Windows printer.

- **Calculator.**

NoteIT allows you to easily perform and save algebra calculations from your keyboard.

## Finding Anything in No Time

NoteIT users are offered multiple intuitive and fast ways to retrieve their notes.

- **Search by note title:** Search for any text string in a note's title, whether beginning, middle, or end, anything will do.
- **Search by note content:** Search for any text string in a note's body.
- **Search by note last edit date:** Search notes that were last saved on a given date, with multiple date format recognition.
- **Search by note title initials:** When the focus is on the titles list, enter a few keystrokes and the note with those initials shows.
- **Search by scrolling note titles list:** Scroll titles up and down and click on the note of your choice.

## Program Features

- Search the Web from the desktop.
- Web results for any note title or any term.
- Print partial, one or multiple notes to any printer.
- Fast and powerful find: Search notes by title, date or content.
- Email one or multiple notes through your email client.
- Calculator.
- Automatic URL recognition.
- Automatic email address recognition.

# DSSF

- Backup and restore notes to and from any drive.
- Store unlimited notes (After buying registration key.)
- Handles up to 150,000 notes with ease.
- Erase notes of your choice.
- Password protection for specific notes.
- Export notes to .rtf, .txt and .html formats.
- Import text from .rtf, .txt and .html formats.
- Insert system paths in your notes.
- Minimize to system tray for easy access.
- Multiple shortcuts: NoteIT offers many easy to remember shortcuts.
- Skinable: NoteIT allows you to use the look and feel of your choice.
- Unlimited version upgrades.
- Ergonomic usability: NoteIT is extremely easy to use.
- Fully built in Visual Basic and MS Access.
- Uninstaller included.
- Minimum requirements: Win 98/Me/NT/2000/XP/2003 Server.
- File size: 2.28 MB.
- Work with multiple NoteIT databases.

## Also Worth Mentioning
